

## ***SURVEY REVIEW* CUMULATIVE INDEX**

### **Volumes 1-35**

#### **D-F**

- Dale, P. F.* A note on scale errors in triangulation. **158**, 388
- Dale, P. F.* A systems view of the cadastre. **191**, 28
- Dale, P. F.* Land information management-a CASLE initiative. **228**, 263
- Dale, P. F.* The Establishment of Control by Tellurometer Radiations. **147**, 206
- Dale, P. F.* Cadastral research project. **167**, 40
- Dalgleish, A. G.* Notes on the Use of the Jerie Analogue Computer for Certain Cadastral Surveys in Kenya. **130**, 182
- Danial, N. F.* Adjustment of plane trilateration nets with fixed points. **197**,313
- Danial, N. F.* Area cutoff by co-ordinates. **212**, 269
- Danial, N. F.* Small trilateration nets in three dimensions. **216**, 75
- Danielsen, J.* Recursion-formulae for the Gauss- Krüger series. **224**, 79
- Danielsen, J.* The Area under the Geodesic. **232**,61
- Danielsen, J.* The Use of Bessel-Spheres for Solution of Problems Related to Geodesics on the Ellipsoid. **253**, 445
- Dann, C.* CASLE -The Commonwealth Association of Surveying and Land Economy. **269**, 414
- Dare, P. and Mutate, E.* The Readjustment and Analysis of Zambia's Isoko Primary Network. **264**,123
- Dark Peak. C. Tomlinson. **169**, 130
- Das, G. B.* A Mathematical Approach to Problems in Photogrammetry. **73**, 131
- Data snooping using observations and parameters with constraints. K. Jeyapalan. **217**, 163
- Datum- 1986. The Definition and Adjustment of the Fiji Geodetic. I. Hannah and I. Maseyk. **231**, 33
- Datum Definitions for GPS Networks. G.Even-Tzur. **277**, 475
- Datum Transformation Parameters for the Kenya Geodetic System. A. S. Lwangasi. **247**, 39
- Datum Transformation Parameters in Southern Africa. J. Rens and C. L. Merry. **236**, 281
- Dauncey, D. (with Parker, D. and Taylor, G.).* The Structured Concept: Realising the World. **253**, 396
- Davis, Q. V.* Lasers and Distance Measurement. **139**, 194; **140**, 269
- Day, J. W. R.* A refined chord-arc method of calculating geodesics: **226**, 191
- Day, J. W. R.* An Improvement upon Bowditch's Method of Adjusting Misclosures. **238**, 396
- Day, J. W. R.* The Finite Distance Scale Factor Formulae for Transverse Mercator. Decumenal Mercator and Skew Orthomorphic Grids correct to Fourth Order Terms. **236**, 244
- Day, J. W. R.* The formula for finding the ordinary latitude from the isometric latitude. **230**,383
- Day, J. W.R.* Convenient Factorisation of Sodano' s Formulae to the Second Order. **263**, 2
- Daylight, Observing Polaris in. S. E. Evans. **69**, 322
- De Graaff-Hunter, J.* Practical Application of the Laplace Longitude-Azimuth Relation to the Control of Geodetic Anomalies. **65**, 131

- De Graaff-Hunter, J.* The Hunter Shutter Eyepiece for Longitude and Azimuth. **63**, 20
- De Graaff-Hunter, J.* The XIth General Assembly of the International Union of Geodesy and Geophysics. **110**, 338
- De Heus, H. M. and Verhoef, H.M.E.* On the Estimation of Polynomial Breakpoints in the Subsidence of the Gröningen Gasfield. **255**,17
- Decae, A. E.* Precision Survey of the 28 BeV Synchrotron in the European Organization for Nuclear Research. **121**, 98; **122**, 146; **123**, 194
- Decae, A. E.* Surveys on the Moon. **122**, 186
- Decimal degree circles. J. R. Smith. **169**, 128
- Declination with the Connolly Compass. J. Clendinning. **8**, 78
- Decumenal Mercator and Skew Orthomorphic Grids correct to Fourth Order Terms. The Finite Distance Scale Factor Formula for Transverse Mercator. J. W. R. Day. **236**, 244
- Deed-Plan. see Beacon. **5**, 203
- Defects of Surveying Telescopes. A. L. Higgins. **55**, 18
- Definition and Adjustment of the Fiji Geodetic Datum-1986. The. J. Hannah and J. Maseyk. **231**, 33
- Definition of Nigerian Geodetic Datum from Recent Doppler Observations. C. V. Ezeigbo. **237**, 343
- Definition of the metre. The new. W. F. Price. **219**, 276
- Deflection of the vertical. Astronomic determinations of. V. Achilli, P. Baldi and S. Zerbini. **208**, 75
- Deflection Prism. The. G. T. M. **32**, 105
- Deflections in a High Precision Network. Effects of Large Vertical. Szu-Pyng Kao. **246**, 474
- Deformation Analysis. Effect of Systematic Errors due to the Non-coincidence of the Reference Surface with the Geoid for the Hellenic Region via. A. M. Agatza-Balodimou and C. Mitsakaki. **232**, 51
- Deformation measurements by geodetic methods. Second international symposium on. J. R. Smith. **193**, 118
- Deformation Models in Space and Time Domain. Identification of. Chen Yong qui. **262**, 518
- Deformation models. Robust estimation in. W. Caspary and H. Borutta. **223**, 29
- Deformation studies on the Mornos Dam area. A. M. Agatza-Baladimou and C. Mitsakaki. **217**, 151
- Degree in Our English Measures. The Quantity of a. J. E. Jackson. **86**, 359
- Deker, H.* The Application of Photogrammetry to Satellite Geodesy. **150**, 363; **151**,6; **152**,60; **153**, 106; **154**, 154; **155**, 202
- Dennis, W. M.* see Rannie. J. L. **15**, 2
- Dennis, W. M.* A Test of Auto-Collimation. **41**, 151
- Dennis, W. M. and Rannie, J. L.* The New Geodetic Tavistock Theodolite. **45**, 393 ; **46**, 458
- Dentith, M. C. (with Featherstone, W. E. and Kirby, J. F.)* Strategies for the Accurate Determination of Orthometric Heights from GPS. **267**, 278
- Departmental Air Photography in Nigeria. R. W. Pring. **78**, 348
- Derivation of Certain Projection, Formulae for the Sphere. The. R. Sacks. **78**, 369
- Design for a Topo Beacon. C. A. Biddle. **101**, 335
- Design for Triaxial Number Facilities on Calculator or Computer. A, B. R. Bowring. **239**, 34

Detail plotting. Three dimensional locational fixation in rapid. J. C. Pugh. **204**, 289

Detailed gravimetric geoid of Kenya. The, M. K. Gachari and J. G. Olliver. **221**, 365

Determinantal Method of solving Normal Equations. W. T. Neill. **36**, 336

Determination of Astronomical Latitude and Longitude when only Time and Horizontal Angles are Observed, A Method of. J. C. Bhattacharji. **110**, 352

Determination of Azimuth and Latitude from Observations of a Single Unknown Star. S. K. Ghosh. **87**, 17

Determination of Azimuth and Latitude from Observations of a Single Unknown Star by a New Method. A. Tarczy-Hornoch. **99**, 212

Determination of Azimuth by Observing Stars at Elongation, Criteria for the. A. F. Smith. **121**, 136

Determination of Elevation, Barometric. a. U. Wilson. 118, 350

Determination of Ground Displacements in the Seismic Zone of Volvi, Greece. P. Savvaidis, J. Martinod, K. Katsambalos, D. Hatzfeld, A. Badellas and K. Tokmakidis. **266**, 229

Determination of heights by laser alignment. J. Kwiecien. **222**, 411

Determination of Latitude and Azimuth from Observations of an Unknown Star. A. Gougenheim. **94**, 342

Determination of Tape Temperatures on the Measurement of the Wankie and Sabi Geodetic Bases, Southern Rhodesia (1953). J. E. S. Bradford. **91**, 210

Determination of the Distortions of the Image formed by a Multiplex Projector. A Method for the. A. M. Wassef. **87**, 26

Determination of the Earth's Gravity Field in Inaccessible Regions. J. C. Bhattacharji. **247**, 22

Determination of the position of the null line of gyroscope oscillations using the transit method. Z. G. Popovic. **213**, 303

Determination of the Refractive Index of Electromagnetic Waves in Mountainous Terrain. J. Saastamoinen. **135**, 11

Determination of the secular movements of the axis of the civic tower at Modena. P. Russo. **207**, 21

Determination The Height, of Mount Kilimanjaro, Tanganyika, East Africa. August-September, 1952. K. T. Pugh. **91**, 194

Determination, Simultaneous, of Latitude, Azimuth and Time by Observations to a Pair of Stars. V. N. S. Murthy. **111**, 15

Determining Astronomical Latitude from Observations of a Star- Pair near their Times of Elongation. A Method of. J. C. Bhattacharji. **114**, 161

Determining Azimuth, Latitude and Longitude. A Photographic Method of. N. J. D. Prescott. **134**, 355

Development aid projects. Surveying, mapping, land tenure arid remote sensing in. G. McGrath, F. P. Ruane and I. T. Logan. **229**, 311

Development in the Design and Construction of Modern Geodetic Instruments, Henry Wild and. Henry Wild, Jnr. **113**, 140

Development of a Low-Cost, Laser-Based System for Three-Dimensional Void Visualisation. A. Wetherelt, A. J. Beer and K. D. Russ. **272**, 74

Development of survey instrumentation 1790-1980. The, R. C. Cox. **219**, 28; **220**, 283

Development of the South American Datum 1969. I. Fischer. **158**, 354

Development of Two Standards. J. R. Smith. **153**, 133

Development-related survey work in Papua New Guinea. P. Done. **212**, 253; **213**, 291

Developments in Hill Shading from Air Photographs in the Directorate of Overseas Surveys. Some Recent. **127**, 3

Developments of Survey in Jamaica. E. D. Stansfield. **42**, 215

Deviation of the Vertical, A Practical Method of Determining Geodetic Azimuth and. J. C. Bhattacharji. **112**, 71

Deviation of the Vertical. A. R. Robbins. **79**, 28

Deviation of the Vertical. Discussion. **80**, 69

Dewar, J. The Year 1933 in the F. M. S. and S. S. **15**, 25

Dewhurst, M. and Chong, A. K. A Statistical Analysis of Real Time Long Range GPS Measurements via Cellular Phone Communications. **266**, 212

Diaphragms. Rewebbing. without Tears. A. V. Lawes. **55**, 26

Diapositives. Non-Flat. The Height Closing Error in Multiplex Bridges caused by. H. Käding. **94**, 349

Dickson, W. L. Temperature Measurement and Surface Chaining for Cadastral Purposes. **96**, 65

Dickson, W. L. The Calculation of the Height of Kilimanjaro. **91**, 206

Differences of Trigonometrical Heights. The Weighting of. H. F. Rainsford. **131**, 228

Differential relationships with applications to adjustment in height controlled space. B. R. Bowring. **210**, 157

Difficulties Experienced in Using Multiplex Plotting Equipment. Some. R. Bowen. **81**, 128

Digital Elevation Data Compression Procedure. A Three-Dimensional. I. M. Gar Al-nabi. **240**, 99

Digital Elevation Data Compression Procedure. Optimisation of the Three-Dimensional. I. M. Gar Al-nabi. **243**, 248

Digital Processing in Hydrography: the HYDRO-CAD Solution. Hybrid. T. K. Koo. **233**, 97

Digital Theodolites. A Proposal for a Laboratory Method to Test. D. Stathas. **262**, 553

Digitisation and Geometrical Improvement of Inhomogeneous Cadastral Maps. D. Morgenstern, K. M. Prell and H. G. Riemer. **234**, 149

Digitized from maps. Adjustment of information. Y. Doytsher and B. Shmutter. **211**, 211

Direct mean versus weighted mean of correlated data. L. Sjöberg. **199**, 3

Direct problem geodetic computation using a programmable pocket calculator. D. W. Murphy. **199**, 11

Direct Use of Air Photographs for Cadastral Purposes in Zanzibar. Sir E. M. Dowson. **63**, 2

Direct Use of Air Photos for Cadastral Purposes in Zanzibar. L. G. Chambers. **71**, 2

Direction (Graphical Method), Triangulation by the. G. H. Halliday. **125**, 310

Direction and time. A rigorous solution for azimuth, latitude and longitude from. O. C. Ezenwere. **201**, 141

Direction Method. Triangulation by the, A Further Note. H. S. Williams. **119**, 18

Direction Method. Triangulation by the. A. P. Atkinson. **110**, 364, **111**, 6

Direction Method. Triangulation by the. J. L. Dixon. **114**, 155

Directions and Angles in a Single Chain. G. H. Menzies. **83**, 219

Directions. Angles and. J. S. Allman. **139**, 219

Directions. Angles versus. H. F. Rainsford. **146**, 146

Directions? Triangulation Adjustment-Angles or. H. F. Rainsford. **141**, 329

Directions. Triangulation Adjustment by. G. R. Dyus. **123**, 226

Directions versus Angles, Least Squares Adjustment of Triangulation. T. Vincenty. **129**, 139

- Directions versus Angles, Least Squares Adjustments of Triangulation. H. F. Rainsford. **87**, 31
- Directorate of Colonial Geodetic and Topographical Surveys. **61**, 271
- Directorate of Overseas Surveys 1946- 1983. A personal tribute to the. A. S. Macdonald. **211**, 193
- Directorate of Overseas Surveys. **166**, 392
- Directorate of Overseas Surveys. Some Recent Developments in Hill Shading from Air Photographs. **127**, 3
- Discussion of Results from the Bowring Formulas Developed for Solutions of the Geodesic Inverse and the Great Elliptic Inverse. B. K. Meade. **261**, 477
- Dissimilar Quantities. Least Squares Adjustment of. J. E. Lilly. **121**, 120
- Dissimilar Quantities. Least-squares Adjustment of. G. J. Thornton-Smith. **136**, 68
- Dissimilar Quantities. The Adjustment and Weighting of. H. Biesheuvel. **126**, 347
- Distance Measurement. Absolute Laser Interferometric. A. N. Golubev. **248**, 109
- Distance Measurement. and a new Rangefinding Device. Indirect Methods of. P. V. Angus-Leppan. **135**, 19
- Distance Measurement. Electronic, in Land Surveying. J. W. Wright. **140**, 280
- Distance Measurement. Lasers and. **133**, 298
- Distance Measurement. Lasers and. Q. V. Davis. **139**, 194; **140**, 269
- Distance Measurement. meter-a field evaluation. The Hewlett-Packard 3800B. B. D. F. Methley. **174**, 337
- Distance Measurement. R. G. S. Discussion on the Tellurometer System of. **107**, 227
- Distance Measurement. The Munich Courses in. R. L. Aston. **107**, 230
- Distance Measurement. The Tellurometer System of. T. L. Wadley. **105**, 100; **106**, 146
- Distance measurements. Some considerations on the temperature dependence during electromagnetic. A. Badellas and P. Savaidis. **198**, 368
- Distance Measurements Some tests of retro-reflective materials for electro-optical. T. J. M. Kennie. **207**, 3; **208**, 51
- Distance meter additive constant error due to infra-red source inhomogeneities. A computer method for a priori investigation of the electro-optical. M. Rezulski and A. Zakrzewski. **208**, 63
- Distance meter. A note on experiences with a Hewlett-Packard 3800 B. C. M. St. John, **175**, 34
- Distance meters. Multiplicity of cyclic errors in electro-optical. P. C. Covell and I. M. Rüeger. **203**, 209
- Distance. Curvature of Electro-magnetic Waves and its Effect on Measurement of. W. Hopcke. **141**, 298
- Distances and Refraction on or near the Apparent Horizon. G. T. M. **24**, 70
- Distances of Long Arcs for Radio Purposes, Computation of. J. H. Cole. **59**, 191
- Distances, The Accurate Measurement of, by High-Frequency Light Variations : The Geodimeter. An Instrument for. **85**, 290; **86**, 363
- Distomat infra-red distancer and its underlying principles. The Wild D110. G. J. Strasser. **154**, 173
- Distorting a Network to Fit Control Points: An Alternative Expression for the Schols Adjustment. J. A. Weightman. **86**, 372
- Distortion Involved in the Readjustment of a Network, Evaluating the : The Schols Adjustment as a Possible Criterion. J. A. Weightman. **89**, 130
- Dividing Engine. The Evolution of the. E. W. Taylor. **52**, 226
- Dixon, J. A.* An investigation into the nature of the isobaric surface in Kenya. **143**, 19
- Dixon, J. L.* Triangulation by the Direction Method. **114**, 155
- Dixon, J. L.* Various Aspects of the Computation of Tellurometer Work. **133**, 323

- Distances of Long Arcs. Computation of, for Radio Purposes. J. H. Cole. **83**, 214;  
**84**, 264
- Doake, C. S. M. (with Wager, A. C., Paren, J. G., and Walton, J. L. W.). Survey reduction for glacier movement studies. **196**, 251
- Dodson, A. H. and Iliffe, J. C. Refraction effects in precise E.D.M. observations. **226**, 181
- Dodson, A. H. and Zaher, M. Refraction effects on vertical angle measurements. 217, 169
- Dodson, A. H. The Status of GPS for Height Determination. **256**, 66
- Dodson, A. H., Ashkenazi, V. and Wuddah-Marley. Rigorous adjustment of an EDM traverse on a desk calculator. **165**, 325
- Dodson, A.H. and Fleming, P. The Geomensor CR204: Baseline test results. **229**, 351
- Dominica, West Indies. Notes on Names for the New Map of. Douglas Taylor. **127**, 11
- Dominion Land Survey (D.L.S.) Grid and land management in the Canadian Great Plains. The surveyor as land manager with some observations on the. R. D. Revel. **216**, 96
- Dominion Land Surveyor, Some Historical Facts, His Training and Qualifications. The. J. E. R. Ross. **49**, 116
- Done, P. (et al). Combined solar ephemeris and azimuth program. **224**, 95
- Done, P. and Methley, B. D. F. The use of acrylic reflectors with electro-optical distance measuring equipment. **195**, 215
- Done, P. and Robertson, M. M. The cadastral system in Trinidad. **228**, 269
- Done, P. Development-related survey work in Papua New Guinea. **212**, 253; **213**, 291
- Done, P. Land and Land Law in the Kingdom of Tonga. **268**, 389
- Donnison, R. D. Preliminary Report on Primary Levelling in Tanganyika. **130**, 186
- Doppler campaign results. Britdoc. 1982. B. Hogarth, S. A. Crane and V. Ashkenazi. **210**, 169
- Doppler Geoid in Africa. H. H. Fashir and K. A. Abdalla. **241**, 175
- Doppler Geoid in Sudan. A. B. Salih, H. H. Fashir and K. A. Abdalla. **237**, 319
- Doppler Observations. Definition of Nigerian Geodetic Datum from Recent. C. V. Ezeigbo. **237**, 343
- Doppler on Sudan geodetic work. Effect of introduction of. A. B. Salih. **211**, 221
- Doppler positioning in the Indian Ocean. P. Staniczenko. **209**, 99
- Doppler positioning. The second international geodetic symposium on satellite. D. W. Proctor. **194**, 181
- Doppler Satellite Control and its Application in the Egyptian Geodetic Network. M. Elhoseny. **235**, 221
- Doppler symposium. The Las Cruces satellite. D. W. Proctor. **187**, 216
- Doppler tracking and geodetic applications. The Royal Society discussion meeting on satellite. T. O. Crompton. **192**, 92
- Doppler translocation. Heights above the geoid for mapping control by. M. C. Breach and P. Maye. **230**, 363
- Double Image Telemeter, The. H. Biesheuvel. **98**, 160
- Double Interpolation, Conformal Transformations by. A. J. Morley. **52**, 245
- Doubly-Braced Quadrilateral of Measured Lines, A Graphical Sidelight on the Adjustment of a. G. J. Thornton-Smith. **124**, 259
- Doubly-Braced Quadrilateral, Adjustment of Measured Angles and Measured Lengths in a. G. J. Thornton-Smith. **131**, 236
- Douglas, H. P. The Hydrographic Year 1930. **1**, 33
- Doukas, J. D. and Badellas, A. G. The application of a statistical technique for identification of outliers in multivariate E.D.M. data. **223**, 13

*Dowman, I. J.* The Casio FX-1 calculating machine. **167**, 46

*Dowman, I. J.* The Sumlock Microscientist 320G calculating machine. **169**, 112

*Dowson, Sir E. M.* Direct Use of Air Photographs for Cadastral Purposes in Zanzibar. **63**, 2

*Dowson, Sir E. M. and Sheppard, V. L. O.* Compilation of the Land Register of England and Wales, **72**, 56

*Dowson, Sir E. M. and Sheppard, V. L. O.* Evolution of Land Records. **60** 202; **64**, 42; **69**, 28

Focussing lens. The design of anallactic surveying telescopes with a positive. S. P. Roy. **193**, 130

Foot. The Two Metres. the Story of an African, G. T. M. **32**, 96

Foot/Metre Conversion Ratio, The, Ordnance Survey. E. H. Thompson. **84**, 280

Foot-Metre Ratio, The Indian, and its Adoption in the Indian Geodetic System. J. C. Bhattacharji. **119**, 13

Foot-point latitude in co-ordinate transformation. Computation of the. A. C. Edoga. **202**, 192

Foreword: Sir W. C. Bottomley. **1**, 2

Formula for finding the ordinary latitude from the isometric latitude. The. J. W. R. Day. **230**, 383

Formula for Normal Gravity in Geodetic Calculations. R. S. Mather. **150**, 341

Formulae for the Gauss-Krüger Series. Recursion. J. Danielsen. **224**, 79

Formulae for the Lambert Conformal Projection (Parts I and II). Computational. C. W. B. King. **229**, 323; **230**, 387

Formulae, Generalized, for the Astronomical Triangle, Conventions and. L. P. Lee. **94**, 372

Formulae, Clarke's, A Note on. J. E. Jackson. **90**, 183

Formulae, for the Adjustment of Survey Errors. W. Wright. **89**, 134

Formulae, Transverse Mercator. J.C. B. Redfearn. **69**, 318

Forty Years of EDM. A. L. Allan. **269**, 455

*Forword, T., Stewart, M. et al.* Traceability and the Calibration of Satellite Positioning Systems. **269**, 437

*Fotiou, A.* A Proposed Method for the Reduction of Long Spatial Distances to a Reference Ellipsoid. **265**, 183

*Fotiou, A. and Papadopoulou, M.* Automation in Land Partitioning Problems. **248**, 80

*Fotiou, A.* Resection in 2-D; Optimisation under Isotropy. **244**, 321
